| Good                         | No majors or critical on day of audit or during audit period   | 12 months                    | 18/12 months  | N/A  |
| Generally Satisfactory       | No more than 2 majors during audit or during audit period rectified promptly No critical during audit period | 12 months                    |   | Within 3 months*   |
| Improvement Necessary        | 3-6 majors during audit or during audit period No critical during audit period                               | 3 months                     |   | Within 1 month   |
| Urgent Improvement Necessary | 1 critical or >6 majors during audit or during audit period  | 2 months                     |   | Within 1 month   |

## 1. Animal Health and Identification (Slaughterhouse / Game Handling Establishments)

| Potential spread | d of animal disease is minimised  | Assessment   |
|------------------|---|--------------|
| 1.1              | Only correctly identified animals / carcases with all relevant documentation (passports, FCI, Trained hunters' declaration) are accepted for slaughter or processing (at Game Handling Establishments)                                | Compliant    |
| 1.2              | FBO takes appropriate action over fitness of animals to be accepted for slaughter based on FCI information and own preslaughter checks  | N/A          |
| 1.3              | Animal health restrictions in disease control area are implemented by slaughterhouse operator   | Not Observed |
| 1.4              | Slaughterhouse operators transporting poultry/lagomorphs ensure suitable crates/modules are used. All equipment used for collecting/delivery are cleaned, washed and disinfected immediately after use and if necessary before re-use | N/A          |

| 3. Hygienio                     | c Production   |            |
|---------------------------------|--|------------|
| Slaughterh                      | nouse / Game Handling Establishment Hygiene  |            |
| FBO contro                      | ols during processing  | Assessment |
| 3.1                             | Animals to be slaughtered / wild game are clean and/or FBO has HACCP based procedures in place to avoid contamination of carcasses from dirty animals  | Compliant  |
| 3.2                             | All handling and processes from slaughtering to despatch are done in a way that avoids the contamination of meat and offal entering the food chain.  | Compliant  |
| 3.3                             | Any visible contamination removed without delay by trimming or alternative means having an equivalent effect   | Compliant  |
| 3.4                             | Where relevant, all edible co-products are handled hygienically and subject to relevant controls (including raw materials intended for further processing)   | N/A        |
| Enabling Post-mortem inspection |  | Assessment |
| 3.5                             | Correlation and correct presentation of parts of slaughtered red meat animals required to be inspected.  Correct presentation of carcases and accompanying offal of birds for post-mortem inspection | Compliant  |
| FBO post-processing controls    |  | Assessment |
| 3.6                             | Carcass and offal are chilled, stored and dispatched within the required temperatures and in a manner that avoids cross-contamination  | Compliant  |

| 3.7          | All products have Health Mark or Identification Mark as appropriate   | Compliant  |
|--------------|---|------------|
| 3.8          | FBO traceability system allows identification of any person from whom they have been supplied with food products, and businesses to which their products have been supplied       | Compliant  |
| 3.9          | All statutory microbiological testing is carried out and appropriate action on receipt of results is being taken.   | N/A        |
| 3.9i         | All statutory Trichinella sampling and testing is carried out and appropriate action on receipt of results is being taken.  | N/A        |
| Cutting Plan | nt / Minced Meat / Meat Preparations / Meat Products Hygiene / M  | SM         |
|              | compliance with (EC) 853/2004 Annex III. II, III, IV, V, VI   | Assessment |
| 3.10         | Legal temperature controls are maintained throughout the process from intake to dispatch for all products and rooms   | Compliant  |
| 3.11         | Controls ensure that risk of cross contamination is minimised, prevented or reduced to acceptable levels during operation and appropriate action taken should contamination occur | Minor      |
| 3.12         | Only permitted raw materials, including water and other ingredients, are used for minced meat, meat preparations, MSM and meat products   | Compliant  |

| 3.13       | All statutory microbiological testing is carried out and appropriate action on receipt of results is being taken.   | Compliant  |
|------------|---|------------|
| 3.14       | Wrapping and Packaging materials not to be a source of contamination, stored and handled in such a way that product contamination is avoided                                | Compliant  |
| 3.15       | Re-usable wrapping and packaging materials for foodstuffs are easy to clean and disinfect and are clean at point of use   | Compliant  |
| 3.16       | Separation of exposed from packaged product   | Compliant  |
| 3.17       | Identification marking complies with the legislation  | Compliant  |
| 3.18       | Labelling of products that require cooking before eating complies with the legislation  | Minor      |
| 3.19       | FBO traceability system allows identification of any person from whom they have been supplied with food products, and businesses to which their products have been supplied | Compliant  |
| RTE Produc | cts   | Assessment |
| 3.20       | Controls provide assurance that critical limits are achieved: pasteurisation and cooling rates for RTE products   | Compliant  |

| 0.04       | Adamsta concretion of DTF and non DTF and set  |            |
|------------|--|------------|
| 3.21       | Adequate separation of RTE and non RTE products  | Compliant  |
| ther Produ | cts of Animal Origin   |            |
| sh and Fis | heries Products  |            |
| rocessing  | compliance with (EC) 853/2004, Annex III, Section VIII   | Assessment |
| 3.22       | Legal temperature controls are maintained throughout the process from intake to dispatch for all fishery products  | N/A        |
| 3.23       | Controls ensure that heading, gutting and filleting are carried out hygienically.  | N/A        |
| 3.24       | FBO has controls in place to ensure that fishery products susceptible to parasite infestation are subject to the required temperature treatment                                      | N/A        |
| 3.25       | Cooking and handling of crustaceans (e.g. crabs) carried out hygienically and temperature requirements adhered to.   | N/A        |
| 3.26       | All statutory microbiological testing is carried out and appropriate action on receipt of results is being taken.  | N/A        |
| 3.27       | Wrapping and Packaging materials not to be a source of contamination, stored and handled in such a way that product contamination is avoided   | N/A        |
| 3.28       | FBO has controls in place to ensure that the health standards criteria for fishery products are met (e.g. organoleptic, histamine, TVN, parasite and toxins harmful to human health) | N/A        |

Ot Fis

| 3.29       | Identification marking complies with the requirements of the regulations  | N/A        |
|------------|---|------------|
| lk and Dai | iry Products  |            |
| ocessing ( | compliance with (EC) 853/2004, Annex III, Section IX  | Assessment |
| 3.30       | Raw milk originates from healthy animals, does not contain residues and complies with the requirements of the Regulations | N/A        |
| 3.31       | Legal temperature controls for the milk are maintained  | N/A        |
| 3.32       | Heat treated milk used for the production of dairy products, complies with the requirements of the Regulations            | N/A        |
| 3.33       | Raw cow's milk used for the manufacturing of dairy products complies with the criteria set in the HACCP plan              | N/A        |
| 3.34       | All statutory microbiological testing is carried out and appropriate action on receipt of results is being taken.         | N/A        |
| 3.35       | Identification marking complies with the requirements of the regulations  | N/A        |
|            |   |            |

Mil

| Eggs and Egg Products  |   |            |
|--|---|------------|
| Processing compliance with (EC) 853/2004, Annex III, Section X |   | Assessment |
| 3.36   | Raw eggs for retail or catering establishments are stored and labelled as required by the Regulations             | N/A        |
| 3.37   | Eggs and raw materials for the manufacture of egg products comply with the requirements of the Regulations        | N/A        |
| 3.38   | All statutory microbiological testing is carried out and appropriate action on receipt of results is being taken. | N/A        |
| 3.39   | Identification marking complies with the requirements of the regulations  | N/A        |

| 1 Environmental Hygiene / Good Hygiene practices |   |            |
|--|---|------------|
| Structure:                                       |   | Assessment |
| 4.1  | Design and layout permit good food hygiene practice and protect against contamination between and during operations                 | Compliant  |
| 4.2  | Room size and number sufficient for different processes, species and throughput   | Compliant  |
| Water suppl                                      | y: potability water supply is assured   | Assessment |
| 4.3  | FBO has operating procedures in place to ensure there is an adequate supply of potable water.                                       | Compliant  |
| 4.4  | The implementation of the operating procedures is effective and supported by records.   | Minor      |
| Maintenance                                      | e: arrangements protect food from contamination   | Assessment |
| 4.5  | FBO has operating procedures in place to ensure their premises, fittings and equipment are maintained in good repair and condition. | Compliant  |
| 4.6  | The implementation of the operating procedures is effective and supported by records.   | Minor      |

| Cleaning: ar | rangements protect food from contamination   | Assessment |
|--------------|--|------------|
| 4.7          | FBO has operating procedures in place to ensure their premises, fittings and equipment are kept clean and when necessary disinfected | Compliant  |
| 4.8          | The implementation of the operating procedures is effective and supported by records.  | Compliant  |
| Pest Contro  | I: arrangements protect food from contamination  | Assessment |
| 4.9          | FBO has operating procedures in place to control pests   | Compliant  |
|              |  |            |

| Staff training | g/instruction and supervision  | Assessment |
|----------------|--|------------|
| 4.11           | FBO has operating procedures in place to supervise, instruct and/or train staff in food hygiene and work procedures commensurate to their work activity  | Compliant  |
| 4.12           | FBO has operating procedures in place to train staff responsible for the development and maintenance of HACCP - based procedures   | Compliant  |
| 4.13           | The implementation of the operating procedures is effective and supported by records.  | Compliant  |
| Health arra    | ngements   | Assessment |
| 4.14           | FBO has operating procedures in place to ensure that no person suffering from or being a carrier of a disease likely to be transmitted through food is permitted to handle or enter a food-handling area | Compliant  |
| 4.15           | The implementation of the operating procedures is effective and supported by records.  | Compliant  |

| 5 Food Safety Systems Based on HACCP Principles (including exception reporting when using the meat diary in small establishments) |  |            |
|---|--|------------|
| - oporting  | mon deling the meat daily in email escapitements)  |            |
| 5.1   | Documented HACCP based procedures cover all foods supplied for human consumption. Specific slaughterhouse HACCP based procedure requirements are also included     | Compliant  |
|   | 1 - identify any hazards that must be prevented,<br>d or reduced to acceptable levels  | Assessment |
| 5.2   | HACCP team and description of product(s) provided  | Compliant  |
| 5.3   | Flow diagrams (description of manufacturing process) available   | Compliant  |
| 5.4   | All hazards that are essential to be controlled by HACCP based procedures have been identified (Physical, Microbiological & Chemical)                              | Compliant  |
| or steps a  | 2 - Identify the Critical Control Points (CCPs) at the step<br>t which control is essential to prevent or eliminate a<br>to reduce it to acceptable levels         | Assessment |
| 5.5   | Correct identification of CCPs or control points at the step or steps at which control is essential for food safety  | Compliant  |
| which sep   | 3 - Establish critical limits at CCPs (or legal limits at CPs) parate acceptability from unacceptability for the n, elimination or reduction of identified hazards | Assessment |
| 5.6   | Critical limits set up to reflect legal requirements, and/or to separate acceptability from unacceptability  | Minor      |

| •    | 4 - establish and implement effective monitoring es at CCP/CPs  | Assessment |
|------|---|------------|
| 5.7  | Monitoring procedures at CCPs or control points (who, where, when, how often) correctly established                                   | Compliant  |
| 5.8  | Monitoring procedures are effective and supported by records  | Compliant  |
|      | 5 - Establish corrective actions when monitoring that a CCP is not under control  | Assessment |
| 5.9  | Corrective action procedures established, for when monitoring indicates that a CCP or control point is not under control              | Minor      |
| 5.10 | Corrective actions are effective and supported by records   | Compliant  |
| -    | 6 - Establish procedures that are carried out regularly to principles 1 - 5 are working effectively                                   | Assessment |
| 5.11 | Validation and verification procedures have been established to regularly demonstrate that the above measures are working effectively | Compliant  |
| 5.12 | If part of FBOs procedures, arrangements for microbiological sampling and analysis of results are established and implemented         | Compliant  |
|      |   |            |

| 5.13       | Verification procedures, including microbiological sampling, are effective and supported records  | Compliant  |
|------------|---|------------|
| the nature | 7 - Establish documents and records commensurate with and size of the food business to demonstrate the application of principles 1 - 6                      | Assessment |
| 5.14       | Staff procedures for day to day control of food safety hazards are recorded and kept up to date (SOPs / RMOPs etc)  | Compliant  |
| 5.15       | Records are established for keeping note of day to day checks and activities for the HACCP based controls   | Compliant  |
| 5.16       | Management records are established for keeping note of supervisory checks and corrective actions e.g. diary, check sheets etc)                              | Compliant  |
| Review     |   | Assessment |
| 5.17       | HACCP plans are reviewed and if necessary amended in response to changes to Suppliers / products / operations / equipment / law etc or following complaints | Compliant  |

| 6. Handling of Animal By-Products / waste to protect human and animal health |   |            |
|--|---|------------|
|  |   | Assessment |
| 6.1  | Animal By-Products are removed from food production areas as quickly as possible, avoiding cross contamination  | Compliant  |
| 6.2  | Animal By-Product containers are leak proof, closable, kept in sound condition, cleaned and disinfected as often as necessary. Waste stores are pest proof. | Compliant  |
| 6.3  | Animal By-Products, including SRM, are correctly identified, segregated and categorised   | Minor      |
| 6.4  | Animal By-Products, including SRM, are correctly stained where necessary  | Compliant  |
| 6.5  | Animal By-Products, including SRM, are dispatched to approved premises with correctly completed commercial documentation                                    | Minor      |

## 7. TSE / SRM Controls

|     |   | Assessment |
|-----|---|------------|
| 7.1 | FBO ensures meat entering the food chain is free from SRM   | Compliant  |
| 7.2 | Animals requiring BSE testing intended for the food chain are tested for BSE/TSE, and processed as per RMOP | N/A        |
| 7.3 | Meat for all animals tested for BSE/TSE does not enter the food chain unless tested negative                | N/A        |
| 7.4 | Imported carcases meet requirements for the removal of SRM  | N/A        |
| 7.5 | Vertebral column from over 30 month cattle is removed and stained   | N/A        |
