Audit Report

(AUD 9/3)

Establishment Details	8		
Establishment Name	A K Stoddart Ltd		
Approval Number	1541		
Approved Activities /	Audited Operations		
	Activity	Audited	Comments
Slaughterhouse	Cattle (Bovine)	Yes	
Cutting Plant	Domestic Ungulates	Yes	
Processing Plant	Treated Stomach, Bladders and Intestines	Yes	
Andit On Cita Vinit	02/04/40		
Audit On-Site Visit	03/04/18		

Audit Outcome (based on numbers of non compliances in the NCR)	Generally Satisfactory	Month of Next Full Audit	Apr-19
--	---------------------------	--------------------------	--------

Audit Outcome	Tolerance for audit outcome	Minimum Full Audit Frequency	Follow Up Partial Audits of critical and major NCs
Good	No majors or critical on day of audit or during audit period 12 months		N/A
Generally Satisfactory	No more than 2 majors during audit or during audit period rectified promptly No critical during audit period	12 months	Within 3 months*
Improvement Necessary 3-6 majors during audit or during audit period No critical during audit period 3 months		3 months	Within 1 month
Urgent Improvement Necessary	1 critical or >6 majors during audit period	2 months	Within 1 month

1. Animal Health and Identification (Slaughterhouse / Game Handling Establishments)			
Potential sp	Assessment		
1.1	Only correctly identified animals / carcases with all relevant documentation (passports, FCI, Trained hunters' declaration) are accepted for slaughter or processing (at Game Handling Establishments)	Minor	
1.2	FBO takes appropriate action over fitness of animals to be accepted for slaughter based on FCI information and own pre-slaughter checks	Compliant	
1.3	Animal health restrictions in disease control area are implemented by slaughterhouse operator	Compliant	
1.4	Slaughterhouse operators transporting poultry/lagomorphs ensure suitable crates/modules are used. All equipment used for collecting/delivery are cleaned, washed and disinfected immediately after use and if necessary before re-use	N/A	

2 Animal Welfare (Slaughterhouse only)	
Compliance with The Welfare of Animals at the Time of Killing Regulation	ns 2014 and
Regulation (EC) No 1099/2009	

General re	quirements for killing and related operations in slaughterhouses.	Assessment
2.1	Animals spared any avoidable pain, distress or suffering during their killing and related operations.	Compliant
2.2	Standard operating procedures (SOPs) are developed, implemented and maintained	Minor
2.3	Designated Animal Welfare Officer (AWO) ensuring compliance with welfare regulations.	Compliant
2.4	Personnel demonstrate appropriate level of competency (including Certificates of Competence).	Compliant
Lairage conditions and handling of animals		Assessment
2.5	Structures of the building safeguard animal welfare (adverse weather protection, adequate ventilation, lairage conditions).	Minor
2.6	Adequate unloading facilities (suitable ramps, containing rails, isolation pens).	Compliant
2.6		Compliant

2.9	Crates/modules are in acceptable condition and handled appropriately when being moved.	Compliant
2.10	Lairaging conditions/pen provisions are adequate (bedding, water, food provision - if left overnight).	Compliant
2.11	Movement of animals (including the correct procedures and use of instruments to make the animals move).	Compliant
Slaughter pr	rocess	Assessment
2.12	Restraining facilities and equipment are adequately designed, constructed and maintained (including shackle lines and records)	Compliant
2.13	Restraining procedures ensure welfare of animals is protected.	Compliant
2.14	Stunning equipment is adequately designed, constructed and maintained (including warning devices and maintenance records).	Compliant
2.15	Stunning methods ensure quick and effective loss of consciousness and sensibility followed by death (stunning and simple stunning).	Compliant
2.16	Provisions for back-up stunning equipment and its use.	Compliant
2.17	Monitoring checks (including actions following checks).	Minor
2.18	Bleeding.	Compliant

3. Hygienic Production			
Slaughterho	ouse / Game Handling Establishment Hygiene		
FBO control	s during processing	Assessment	
3.1	Animals to be slaughtered / wild game are clean and/or FBO has HACCP based procedures in place to avoid contamination of carcasses from dirty animals	Compliant	
3.2	All handling and processes from slaughtering to despatch are done in a way that avoids the contamination of meat and offal entering the food chain.	Minor	
3.3	Any visible contamination removed without delay by trimming or alternative means having an equivalent effect	Major	
3.4	Where relevant, all edible co-products are handled hygienically and subject to relevant controls (including raw materials intended for further processing)	Compliant	
Enabling Post-mortem inspection		Assessment	
3.5	Correlation and correct presentation of parts of slaughtered red meat animals required to be inspected. Correct presentation of carcases and accompanying offal of birds for post-mortem inspection	Compliant	
FBO post-processing controls		Assessment	
3.6	Carcass and offal are chilled, stored and dispatched within the required temperatures and in a manner that avoids cross-contamination	Compliant	

3.7	All products have Health Mark or Identification Mark as appropriate	Compliant
3.8	FBO traceability system allows identification of any person from whom they have been supplied with food products, and businesses to which their products have been supplied	Compliant
3.9	All statutory microbiological testing is carried out and appropriate action on receipt of results is being taken.	Compliant
3.9i	All statutory Trichinella sampling and testing is carried out and appropriate action on receipt of results is being taken.	Compliant
Cutting Plan	nt / Minced Meat / Meat Preparations / Meat Products Hygiene / M	SM
Processing compliance with (EC) 853/2004 Annex III. Sections I, II, III, IV, V, VI		Assessment
3.10	Legal temperature controls are maintained throughout the process from intake to dispatch for all products and rooms	Compliant
3.11	Controls ensure that risk of cross contamination is minimised, prevented or reduced to acceptable levels during operation and appropriate action taken should contamination occur	Minor
3.12	Only permitted raw materials, including water and other ingredients, are used for minced meat, meat preparations, MSM and meat products	Compliant

3.13	All statutory microbiological testing is carried out and appropriate action on receipt of results is being taken.	Compliant
3.14	Wrapping and Packaging materials not to be a source of contamination, stored and handled in such a way that product contamination is avoided	Compliant
3.15	Re-usable wrapping and packaging materials for foodstuffs are easy to clean and disinfect and are clean at point of use	Compliant
3.16	Separation of exposed from packaged product	Compliant
3.17	Identification marking complies with the legislation	Compliant
3.18	Labelling of products that require cooking before eating complies with the legislation	Compliant
3.19	FBO traceability system allows identification of any person from whom they have been supplied with food products, and businesses to which their products have been supplied	Compliant

4 Environm	4 Environmental Hygiene / Good Hygiene practices		
Structure:		Assessment	
4.1	Design and layout permit good food hygiene practice and protect against contamination between and during operations	Compliant	
4.2	Room size and number sufficient for different processes, species and throughput	Minor	
Water supp	ly: potability water supply is assured	Assessment	
4.3	FBO has operating procedures in place to ensure there is an adequate supply of potable water.	Compliant	
4.4	The implementation of the operating procedures is effective and supported by records.	Compliant	
Maintenance: arrangements protect food from contamination		Assessment	
4.5	FBO has operating procedures in place to ensure their premises, fittings and equipment are maintained in good repair and condition.	Compliant	
4.6	The implementation of the operating procedures is effective and supported by records.	Compliant	
Cleaning: arrangements protect food from contamination		Assessment	
4.7	FBO has operating procedures in place to ensure their premises, fittings and equipment are kept clean and when necessary disinfected	Compliant	
4.8	The implementation of the operating procedures is effective and supported by records.	Minor	

Pest Contro	: arrangements protect food from contamination	Assessment
4.9	FBO has operating procedures in place to control pests	Compliant
4.10	The implementation of the operating procedures is effective and supported by records.	Compliant
Staff training	/instruction and supervision	Assessment
4.11	FBO has operating procedures in place to supervise, instruct and/or train staff in food hygiene and work procedures commensurate to their work activity	Compliant
4.12	FBO has operating procedures in place to train staff responsible for the development and maintenance of HACCP - based procedures	Compliant
4.13	The implementation of the operating procedures is effective and supported by records.	Major
Health arra	ngements	Assessment
4.14	FBO has operating procedures in place to ensure that no person suffering from or being a carrier of a disease likely to be transmitted through food is permitted to handle or enter a food-handling area	Compliant
4.15	The implementation of the operating procedures is effective and supported by records.	Compliant

Assessment Documented HACCP based procedures cover all foods supplied for human consumption. Specific slaughterhouse HACCP based procedure requirements are also included Principle 1 - identify any hazards that must be prevented, eliminated or reduced to acceptable levels 1.2 HACCP team and description of product(s) provided Compliant 1.3 Flow diagrams (description of manufacturing process) available All hazards that are essential to be controlled by HACCP based procedures have been identified (Physical, Microbiological & Chemical) Principle 2 - Identify the Critical Control Points (CCPs) at the step or steps at which control is essential to prevent or eliminate a hazard or to reduce it to acceptable levels Correct identification of CCPs or control points at the step or steps at which control is essential for food safety Minor	· · · · · · · · · · · · · · · · · ·				
Documented HACCP based procedures cover all foods supplied for human consumption. Specific slaughterhouse HACCP based procedure requirements are also included Principle 1 - identify any hazards that must be prevented, eliminated or reduced to acceptable levels 5.2 HACCP team and description of product(s) provided Compliant Flow diagrams (description of manufacturing process) available All hazards that are essential to be controlled by HACCP based procedures have been identified (Physical, Microbiological & Chemical) Principle 2 - identify the Critical Control Points (CCPs) at the step or steps at which control is essential to prevent or eliminate a hazard or to reduce it to acceptable levels 5.5 Correct identification of CCPs or control points at the step or steps at which control is essential for food safety Principle 3 - Establish critical limits at CCPs (or legal limits at CPs) which separate acceptability from unacceptability for the prevention, elimination or reduction of identified hazards Compliant Compliant Assessment Assessment	5 Food Safety Systems Based on HACCP Principles (including exception reporting when using the meat diary in small establishments)				
S.1 supplied for human consumption. Specific slaughterhouse HACCP based procedure requirements are also included Principle 1 - identify any hazards that must be prevented, eliminated or reduced to acceptable levels S.2 HACCP team and description of product(s) provided Compliant Flow diagrams (description of manufacturing process) available All hazards that are essential to be controlled by HACCP based procedures have been identified (Physical, Microbiological & Chemical) Principle 2 - Identify the Critical Control Points (CCPs) at the step or steps at which control is essential to prevent or eliminate a hazard or to reduce it to acceptable levels S.5 Correct identification of CCPs or control points at the step or steps at which control is essential for food safety Principle 3 - Establish critical limits at CCPs (or legal limits at CPs) which separate acceptability from unacceptability for the prevention, elimination or reduction of identified hazards Critical limits set up to reflect legal requirements, and/or to			Assessment		
### ### ##############################	5.1 s	supplied for human consumption. Specific slaughterhouse	Compliant		
Flow diagrams (description of product(s) provided Compliant 5.3 Flow diagrams (description of manufacturing process) All hazards that are essential to be controlled by HACCP based procedures have been identified (Physical, Microbiological & Chemical) Principle 2 - Identify the Critical Control Points (CCPs) at the step or steps at which control is essential to prevent or eliminate a hazard or to reduce it to acceptable levels 5.5 Correct identification of CCPs or control points at the step or steps at which control is essential for food safety Minor Principle 3 - Establish critical limits at CCPs (or legal limits at CPs) which separate acceptability from unacceptability for the prevention, elimination or reduction of identified hazards Critical limits set up to reflect legal requirements, and/or to			Assessment		
All hazards that are essential to be controlled by HACCP based procedures have been identified (Physical, Microbiological & Chemical) Principle 2 - Identify the Critical Control Points (CCPs) at the step or steps at which control is essential to prevent or eliminate a hazard or to reduce it to acceptable levels 5.5 Correct identification of CCPs or control points at the step or steps at which control is essential for food safety Minor Principle 3 - Establish critical limits at CCPs (or legal limits at CPs) which separate acceptability from unacceptability for the prevention, elimination or reduction of identified hazards Critical limits set up to reflect legal requirements, and/or to		•	Compliant		
based procedures have been identified (Physical, Microbiological & Chemical) Principle 2 - Identify the Critical Control Points (CCPs) at the step or steps at which control is essential to prevent or eliminate a hazard or to reduce it to acceptable levels Correct identification of CCPs or control points at the step or steps at which control is essential for food safety Minor Principle 3 - Establish critical limits at CCPs (or legal limits at CPs) which separate acceptability from unacceptability for the prevention, elimination or reduction of identified hazards Critical limits set up to reflect legal requirements, and/or to			Compliant		
Assessment Assessment Assessment Correct identification of CCPs or control points at the step or steps at which control is essential for food safety Principle 3 - Establish critical limits at CCPs (or legal limits at CPs) which separate acceptability from unacceptability for the prevention, elimination or reduction of identified hazards Critical limits set up to reflect legal requirements, and/or to	5.4 b	pased procedures have been identified	Compliant		
Principle 3 - Establish critical limits at CCPs (or legal limits at CPs) which separate acceptability from unacceptability for the prevention, elimination or reduction of identified hazards Critical limits set up to reflect legal requirements, and/or to	or steps at which control is essential to prevent or eliminate a		Assessment		
which separate acceptability from unacceptability for the prevention, elimination or reduction of identified hazards Critical limits set up to reflect legal requirements, and/or to			Minor		
66 Compliant	which separate acceptability from unacceptability for the		Assessment		
	66	, , , , , , , , , , , , , , , , , , , ,	Compliant		

Principle procedure	Assessment	
5.7	Monitoring procedures at CCPs or control points (who, where, when, how often) correctly established	Compliant
5.8	Monitoring procedures are effective and supported by records	Linked to another item
	5 - Establish corrective actions when monitoring that a CCP is not under control	Assessment
5.9	Corrective action procedures established, for when monitoring indicates that a CCP or control point is not under control	Compliant
5.10	Corrective actions are effective and supported by records	Linked to another item
Principle 6 - Establish procedures that are carried out regularly to verify that principles 1 - 5 are working effectively		Assessment
5.11	Validation and verification procedures have been established to regularly demonstrate that the above measures are working effectively	Compliant
5.12	If part of FBOs procedures, arrangements for microbiological sampling and analysis of results are established and implemented	Compliant

5.13	Verification procedures, including microbiological sampling, are effective and supported records	Compliant
the nature	7 - Establish documents and records commensurate with e and size of the food business to demonstrate the application of principles 1 - 6	Assessment
5.14	Staff procedures for day to day control of food safety hazards are recorded and kept up to date (SOPs / RMOPs etc)	Compliant
5.15	Records are established for keeping note of day to day checks and activities for the HACCP based controls	Compliant
5.16	Management records are established for keeping note of supervisory checks and corrective actions e.g. diary, check sheets etc)	Compliant
Review		Assessment
5.17	HACCP plans are reviewed and if necessary amended in response to changes to Suppliers / products / operations / equipment / law etc or following complaints	Compliant

6. Handling of Animal By-Products / waste to protect human and animal health		
	Assessment	
Animal By-Products are removed from food production areas as quickly as possible, avoiding cross contamination	Compliant	
Animal By-Product containers are leak proof, closable, kept in sound condition, cleaned and disinfected as often as necessary. Waste stores are pest proof.	Compliant	
Animal By-Products, including SRM, are correctly identified, segregated and categorised	Minor	
Animal By-Products, including SRM, are correctly stained where necessary	Compliant	
Animal By-Products, including SRM, are dispatched to approved premises with correctly completed commercial documentation	Minor	

7. TSE / SRM Controls			
		Assessment	
7.1	FBO ensures meat entering the food chain is free from SRM	Minor	
7.2	Animals requiring BSE testing intended for the food chain are tested for BSE/TSE, and processed as per RMOP	Minor	
7.3	Meat for all animals tested for BSE/TSE does not enter the food chain unless tested negative	Compliant	
7.4	Imported carcases meet requirements for the removal of SRM	N/A	
7.5	Vertebral column from over 30 month cattle is removed and stained	Compliant
