## DEFINITIONS

<b>Compliant</b> - food business is operating in accordance with its food safety management systems, food safety standards and has met the requirements of the regulations.
<b>Minor</b> – not likely to compromise public health (including food safety) or animal health or welfare or lead to the handling of unsafe or unsuitable food. A minor non-compliance is an isolated low risk situation and does not compromise achieving control measures of the food safety program i.e. overall the food safety program is still effective in controlling the food safety hazards. When viewed collectively a number of related minor non-compliances may represent a major non-compliance.
<b>Major</b> - likely to compromise public health (including food safety) or animal health or welfare or may lead to the production and handling of unsafe or unsuitable food if no remedial action is taken . When viewed collectively a number of related major non-compliances may represent critical non-compliance.
<b>Critical</b> - contravention poses an imminent and serious risk to public health (including food safety) or animal health or welfare.

<b>Audit Outcome</b> (based on numbers of non compliances in the NCR)	<b>Good</b>
